Preface

Companion Guides (CG) may contain two types of data, instructions for electronic communications with the publishing entity (Communications/Connectivity Instructions) and supplemental information for creating transactions for the publishing entity while ensuring compliance with the associated ASC X12 IG (Transaction Instructions). Either the Communications/Connectivity component or the Transaction Instruction component must be included in every CG. The components may be published as separate documents or as a single document.

The Communications/Connectivity component is included in the CG when the publishing entity wants to convey the information needed to commence and maintain communication exchange.

The Transaction Instruction component is included in the CG when the publishing entity wants to clarify the IG instructions for submission of specific electronic transactions. The Transaction Instruction component content is limited by ASCX12's copyrights and Fair Use statement.

1. Transaction Instruction (TI) Introduction

1.1 BACKGROUND

1.1.1 Overview of HIPAA Legislation

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carry provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (HHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and plans. HIPAA directs the Secretary to adopt standards for transactions to enable health information to be exchanged electronically and to adopt specifications for implementing each standard HIPAA serves to:

- Create better access to health insurance
- Limit fraud and abuse
- Reduce administrative costs

1.1.2 Compliance According to HIPAA

The HIPAA regulations at 45 CFR 162.915 require that covered entities not enter into a trading partner agreement that would do any of the following:

- Change the definition, data condition, or use of a data element or segment in a standard.
- Add any data elements or segments to the maximum defined data set.
- Use any code or data elements that are marked “not used” in the standard’s implementation specifications or are not in the standard’s implementation specification(s).
- Change the meaning or intent of the standard’s implementation specification(s).

1.1.3 Compliance According to ASC X12

ASC X12 requirements include specific restrictions that prohibit trading partners from:

- Modifying any defining, explanatory, or clarifying content contained in the implementation guide.
- Modifying any requirement contained in the implementation guide.

1.2 INTENDED USE

The Transaction Instruction component of this companion guide must be used in conjunction with an associated ASC X12 Implementation Guide. The instructions in this companion guide are not intended to be stand-alone requirements documents. This companion guide conforms to all the requirements of any associated ASC X12 Implementation Guides, and is in conformance with ASC X12’s Fair Use and Copyright statements.

1.3 INTENDED AUDIENCE

This companion guide is intended for the business and technical users, within or on behalf of trading partners, responsible for the testing and setup of electronic claims submissions to NCTracks. In addition, this information should be communicated to, and coordinated with, the provider's billing office in order to ensure that the required billing information is provided to its billing agent/submitter.

1.4 PURPOSE OF COMPANION GUIDE

The Companion Guide is to be used with, and to supplement the requirements in the HIPAA ASC X12 Implementation Guides, without contradicting those requirements. Implementation Guides define the national data standards, electronic format, and values for each data element within an electronic transaction. The purpose of the Companion guide is to provide trading partners with a guide to communicate NCTracks specific information required to successfully exchange transactions.

The primary purpose of this document is to assist the trading partner with the appropriate use of the transaction and is not intended to be a billing or policy guide.

1.5 ACKNOWLEDGEMENTS

For all inbound transactions, a 997 Acknowledgement report will be sent to the trading partner's OUTBOX for retrieval. This report serves as the acknowledgement of the submission of a file. Typically, 999 Acknowledgement reports are available within moments of submission.

1.6 TRADING PARTNER AGREEMENT SETUP

This is a test version – more information will be provided with the final version of the Companion Guide

1.7 TESTING

NC DHHS (DMA, DMH, and DPH) requires testing, or third party certification, prior to approving a trading partner to submit claims in production. Once in production, NC DHHS (DMA, DMH,DPH) reserves the right to require re-testing if it is determined the trading partner is receiving/generating an unacceptable volume of errors.

This is a test version – more information will be provided with the final version of the Companion Guide

2. Included ASC X12 Implementation Guides

4. TI Additional Information

4.1 BUSINESS SCENARIOS

The 270/271 is to be used to verify eligibility prior to performing services.

Use of the 270/271 transaction set in batch mode allows trading partners to submit multiple eligibility requests for multiple recipients. Only single transactions are allowed to be submitted as real time transactions.

4.2 PAYER SPECIFIC BUSINESS RULES AND LIMITATIONS

4.2.1 Search Criteria

The following search criteria are supported:

Scenario	Recipient ID	SSN	DOB	Last Name	First Name
1	X				
2		X	X		
3	X	X	X		

4.2.2 Eligibility Returned

Eligibility information is returned based on the NCTracks payer and the benefit plan(s) for the payer.

Centers for Medicare and Medicaid Services (CMS) rules prevent sending dates > 365 days before the 1st day of the query month. Division of Public Health (DPH) allows up to 12 months into the future. DMA does not allow dates beyond the end of the current month.

DMH information is not returned. That information is available through the Local Managing Entity (LME).

4.2.3 Range of Dates Supported for Inquiries

An inquiry may not be for dates > 365 days before the 1st day of the query month.

DPH allows inquiries for up to 12 months beyond the end of the current month. Division of Medical Assistance (DMA) does not allow dates beyond the end of the current month

4.2.4 Benefit Plans Returned

Eligibility information is only returned when the requesting provider and recipient are enrolled in the same benefit plan(s).

Eligibility information is not returned for benefit plans that are covered by the Division of Mental Health (DMH).

4.2.5 Reference Number Returned

A reference number is returned in 2100A REF02 when the payer is the DMA. The reference number can be used to identify an eligibility request for tracking or research purposes.

4.2.6 997 Acknowledgement

A 997 acknowledgement is returned for all 270 batch submissions.

4.3 SCHEDULED MAINTENANCE
